

CONTENTS

Opening Remarks

Hot Points in Multifrequency Astrophysics Today <i>F. Giovannelli and L. Sabau-Graziati</i>	1
Cosmological Implications of Neutrino Mass <i>G. Auriemma</i>	29
Bright Light from Dark Matter (Baryonic and Non-baryonic) <i>Richard Conn Henry</i>	40
Blazars and Cosmic Backgrounds <i>Sergio Colafrancesco and Paolo Giommi</i>	47
Those daily Gamma-Ray Bursts: Where do they come from? <i>Wolfgang Kundt</i>	57
Correlations between Coincidences of Gravitational Waves Nautilus and Explorer and X-ray Emission of 4U1820–30 and XTE J1550–564 <i>Gian Paolo Murtas</i>	63
High-Energy Astrophysics and the Virtual Observatory <i>Paolo Padovani</i>	73

Cosmology

On the Reionization of the Universe <i>Nino Panagia</i>	82
The Energetic Problem of X-Ray Emission from the Coma Cluster <i>V. A. Dogiel</i>	91
Multi-Frequency Search for Dark Matter in Cosmic Structures <i>Sergio Colafrancesco</i>	95

High Energy Astrophysics

Centaurus A: A Multifrequency Review <i>Helmut Steinle</i>	106
Blazars and INTEGRAL <i>R. Hudec, F. Munz, P. Kubánek and E. Pian</i>	114
Chandra Observations of the ρ Ophiuchi Cloud <i>Katsuji Koyama and Kensuke Imanishi</i>	119
Infrared and X-ray Emission in High Mass Star Forming Regions <i>Paolo Persi and Anna Rosa Marenzi</i>	125

Search for Massive Planets in the Disks of FU Orionis Objects	
<i>A. A. Vittone and L. Errico</i>	132
Multicolour Photometry and Spectroscopy of the Slow Nova V475 Sct (Nova Scuti 2003)	
<i>D. Chochol, N. A. Katysheva, T. Pribulla, L. Schmidtobreick, S. Yu. Shugarov, P. Škoda,</i> <i>M. Šlechta, A. A. Vittone and I. M. Volkov</i>	137
Unveiling the Nature of <i>INTEGRAL</i> Sources Through Optical Spectroscopy	
<i>Nicola Masetti</i>	143
Cataclysmic Variables Observed with <i>INTEGRAL</i>	
<i>Vojtěch Šimon, René Hudec, Filip Munz and Jan Štrobl</i>	149
Magnetars' Giant Flares: the Case of SGR 1806–20	
<i>Nanda Rea, GianLuca Israel, Sandro Mereghetti, Andrea Tiengo, Silvia Zane,</i> <i>Roberto Turolla and Luigi Stella</i>	155
The Formation of Precessional Spiral Density Wave in Accretion Disks and a New Model for Superoutbursts in SU UMa-type Binaries	
<i>D. V. Bisikalo, A. A. Boyarchuk, P. V. Kaygorodov, O. A. Kuznetsov and T. Matsuda</i>	159
Understanding AXPs and SGRs through the December 2004 SGR 1806–20's Hyperflare	
<i>GianLuca Israel</i>	164
Supernovae at Various Wavelengths	
<i>John Danziger</i>	169
Neutrinos from Supernovae: a Review	
<i>J. H. Beall</i>	174
High Resolution and Broad Band Spectra of Low Mass X-ray Binaries: A Comparison between Black Holes and Neutron Stars	
<i>Tiziana Di Salvo, Rosario Iaria, Natale Robba and Luciano Burderi</i>	183
Timing an Accreting Millisecond Pulsar: Measuring the Accretion Torque in IGR J00291+5934	
<i>L. Burderi, T. Di Salvo, A. Riggio, M. T. Menna, G. Lavagetto, A. Papitto, R. Iaria,</i> <i>N. R. Robba and L. Stella</i>	192
Statistical Properties of the Combined Emission of a Discrete Source Population: Astrophysical Implications	
<i>Hans-Jakob Grimm, Marat Gilfanov and Rashid Sunyaev</i>	197
General Relativistic Radiative Transfer: Emission from Accreting Black Holes in AGN	
<i>Kinwah Wu, Steven V. Fuerst, Khee-Gan Lee and Graziella Branduardi-Raymont</i>	205
Mass and Angular Momentum of Black Holes: An Overlooked Effect of General Relativity Applied to the Galactic Center Black Hole Sgr A*	
<i>B. Aschenbach</i>	221
News from Cyg X-1 and Other Galactic Black Holes	
<i>Janusz Ziółkowski</i>	228
Status and Future Prospects for γ -ray Polarimetry	
<i>M. L. McConnelli and P. F. Bloser</i>	237
Multifrequency Polarization Properties of Blazars	
<i>S. Jorstad, A. Marscher, J. Stevens, P. Smith, J. Forster, M. Lister, A. Stirling, J. Gómez,</i> <i>T. Cawthorne, W. Gear and I. Robson</i>	247

Searches for Supermassive Black Hole Binaries	
<i>R. Hudec and M. Basta</i>	253
Jet Sources and Gamma Ray Bursts	
Study of Two BeppoSAX Observations of GX 340+0	
<i>R. Iaria, G. Lavagetto, T. Di Salvo, A. D’Ai’, L. Burderi, L. Stella and N. R. Robba</i>	257
The Intimate Connection between High and Low Frequency Emission in Blazars	
<i>Alan P. Marscher</i>	262
Microquasars: What do radio and X-ray observations tell us?	
<i>Diana C. Hannikainen, Kinwah Wu, Jason A. Stevens, Osmi Vilhu, Jérôme Rodriguez, Linnea Hjalmsdotter and Richard W. Hunstead</i>	269
All the Astrophysical Jet Sources: Driven by Mono-energetic e^{\pm} Beams?	
<i>Wolfgang Kundt</i>	279
Energetics of Jet Interactions with the Intracluster Medium	
<i>J. H. Beall, John Guillory, D. V. Rose, Sabine Schindler and S. Colafrancesco</i>	283
New Results on Cosmic Gamma-Ray Bursts	
<i>Kevin Hurley</i>	292
Fireball and Cannonball Models of Gamma-Ray Bursts Confront Observations	
<i>Arnon Dar</i>	301
Supernovae and Gamma-Ray Bursts	
<i>Massimo Della Valle</i>	315
Hyperstars – Main Origin of Short Gamma-Ray Bursts?	
<i>Arnon Dar</i>	323
The Early (< 1 hr) Multi-Colour Afterglow of GRB 050502a with the 2-m Liverpool Telescope	
<i>C. Guidorzi, A. Monfardini, A. Gomboc, C. G. Mundell, I. A. Steele, D. Carter, M. F. Bode, R. J. Smith, C. J. Mottram, M. J. Burgdorf, N. R. Tanvir, N. Masetti and E. Pian</i>	330
Anisotropies in Core Collapse Supernovae	
<i>Elena Pian and P. A. Mazzali</i>	335
GRBs, SGRs by UHE leptons showering, blazing and re-brightening by precessing Gamma Jets in-off axis	
<i>D. Fargion and M. Grossi</i>	342
Ongoing Experiments	
Search for Dark Matter with GLAST	
<i>Aldo Morselli</i>	349
Swift Gamma-Ray Burst Explorer: The First Results	
<i>John A. Nousek</i>	357
The X-shooter Spectrograph: A Second Generation Instrument for the VLT	
<i>Stefano Covino, Filippo Maria Zerbi, Roberto Pallavicini, Paolo Conconi, Rosario Cosentino, Vincenzo De Caprio, Antonio de Ugarte Postigo, Paolo Di Marcantonio, Marco Riva, Paolo Santin, Paolo Spanó and A. Zacchei</i>	361
Measurements of Gamma-Ray Bursts with GLAST	
<i>Hemut Steinle, N. P. Bhat, M. S. Briggs, V. Connaughton, R. Diehl, G. J. Fishman, J. Greiner,</i>	

<i>R. M. Kippen, A. von Kienlin, C. Kouveliotou, G. G. Lichti, C. A. Meegan, W. S. Paciasas,</i>	
<i>R. D. Preece and R. B. Wilson</i>	365
Characteristics and Performance of the GAW Experiment for a Large Field of View Čerenkov Gamma-ray Telescope	
<i>G. Cusumano, G. Agnetta, P. Assis, B. Biondo, P. Brogueira, O. Catalano, F. Celi, J. Costa,</i>	
<i>C. Delgado, G. Di Cocco, M. C. Espirito Santo, P. Galeotti, S. Giarrusso, A. La Barbera,</i>	
<i>G. La Rosa, M. C. Maccarone, A. Mangano, T. Mineo, M. Moles, M. Pimenta, F. Prada,</i>	
<i>F. Russo, B. Sacco, M. A. Sanchez, A. Segreto, B. Tomé, A. de Ugarte Postigo,</i>	
<i>P. Vallania and C. Vigorito</i>	369
Gamma-ray Astrophysics with the Space Detector AGILE	
<i>C. Pittori and M. Tavani</i>	373
The World Space Observatory Project for Ultraviolet	
<i>I. Pagano and M. Rodonó</i>	377
Astrophysics with LOBSTER	
<i>R. Hudec, V. Šimon, L. Svéda, L. Pina and A. Inneman</i>	383
The MEGA Project for Medium Energy Gamma-ray Astronomy	
<i>P. F. Bloser, J. M. Ryan, M. L. McConnell, J. R. Macri, U. Bravar, G. Kanbach, R. Andritschke,</i>	
<i>M. Ajello, A. Zoglauer, S. D. Hunter, B. F. Philips, E. A. Wulf, D. H. Hartmann, R. S. Miller,</i>	
<i>W. S. Paciasas, A. D. Zych, R. M. Kippen, T. Vestrand, M. L. Cherry, T. G. Guzik, J. G. Stacy,</i>	
<i>J. P. Wefel, V. Reglero, G. Di Cocco and J. P. Cravens</i>	388
GRAPE - A Balloon-Borne Gamma-Ray Polarimeter Experiment	
<i>P. F. Bloser, J. S. Legere, J. R. Macri, M. L. McConnell, T. Narita and J. M. Ryan</i>	393
Special Night Session	
May Gravity reveal Tsunami ?	
<i>D. Fargion</i>	398
Concluding Remarks	
Concluding Remarks	
<i>Janusz Ziótkowski</i>	403
Concluding Address	
Concluding Address	
<i>Franco Giovannelli</i>	407
