

CONTENTS

Exploring the <i>INTEGRAL</i> Sources in Search for New Microquasars <i>M. Ribó, J. A. Combi and I. F. Mirabel</i>	1
A Toy Model for 3:2 Ratio of kHz QPO Frequency in Black Hole X-ray Binaries <i>Ding-Xiong Wang, Yong-Chun Ye, Ren-Yi Ma and Xiao-Long Gong</i>	7
Shot Timescales in Accreting Black Hole Binaries: <i>w</i> Spectrum and Its Application <i>Hua Feng, Shuang-Nan Zhang and Ti-Pei Li</i>	13
Some Conclusions on the MHD Alfvén Wave Oscillation Model of kHz QPO <i>Chengmin Zhang</i>	21
Numerical Simulations Reveal the Origin of QPOs in Black Hole Candidates <i>Sandip K. Chakrabarti</i>	27
Class Transitions in Black Holes (Invited Report) <i>Sandip K. Chakrabarti</i>	33
Magnetic Pumping in Accretion Disk Coronae <i>R. Belmont and M. Tagger</i>	43
Microquasar: Disk Models (Invited Report) <i>Shin Mineshige and Ken-ya Watarai</i>	49
Observations of Rapid Disk-Jet Interaction in GRS 1915+105 <i>David M. Rothstein, Stephen S. Eikenberry and Keith Matthews</i>	57
Evidence for Jet Collimation in SS 433 with the Chandra HETGS <i>Masaaki Namiki, Nobuyuki Kawai, Taro Kotani and Kazuo Makishima</i>	63
Results of Recent Multi-wavelength Campaign of SS 433 <i>Sabyasachi Pal, Sandip K. Chakrabarti, K. Goswami, A. Nandi, B. G. Ananda Rao and S. Mondal</i>	69
Evolutionary Constraints on the Masses of the Components of HDE 226868/Cyg X-1 Binary System <i>Janusz Ziótkowski</i>	75
Gamma-Ray Spectral Characteristics of Thermal and Non-Thermal Emission from Three Black Holes <i>James C. Ling and William A. Wheaton</i>	80
Low Frequency Radio Observations of GRS1915+105 with GMRT <i>C. H. Ishwara-Chandra, A. Pramesh Rao, Mamta Pandey, R. K. Manchanda and Philippe Durouchoux</i>	87

Unveiling the Nature of the New Transient IGR J19140+0951 <i>C. Cabanac, J. Rodriguez, P-O. Petrucci, G. Henri, D.C. Hannikainen, J. Schultz, N. Lund and P. Durouchoux</i>	93
The Properties of the Absorbing and Line Emitting Material in IGR J16318–4848 <i>Giorgio Matt and M. Guainazzi</i>	99
INTEGRAL Reveals a New Class of Obscured High Mass X-Ray Binaries: Focus on IGR J16318–4848 <i>Sylvain Chaty and Philippe Filliatre</i>	104
Microquasars and Gamma-ray Sources (Invited Report) <i>Gustavo E. Romero</i>	110
Microquasars as High-energy Gamma-ray Sources (Invited Report) <i>Josep M. Paredes</i>	121
High-energy γ -ray Emission from Microquasars: LS 5039 and LS I +61 303 <i>V. Bosch-Ramon and J. M. Paredes</i>	133
Multiwavelength Observations of Ultraluminous X-Ray Sources <i>Philip Kaaret</i>	139
QSO-Galaxy Association and Gravitational Lensing <i>S. M. Tang and S. N. Zhang</i>	147
Classifying the Zoo of Ultraluminous X-ray Sources <i>Roberto Soria, Mark Cropper and Christian Motch</i>	153
Black Hole X-ray Binaries in the Elliptical Galaxy NGC 1399 <i>M. Loewenstein, L. Angelini and R. F. Mushotzky</i>	159
Environment, Energy Injection, High-Energy Radiation, and Cosmological Use of Gamma-Ray Bursts <i>Z. G. Dai</i>	164
Probing GRB Jet Structure from Prompt Emission <i>Jon Hakkila, Timothy W. Giblin, Kevin C. Young, David J. Haglin, Richard J. Roiger, Jay P. Norris and Jerry D. Bonnell</i>	171
Detecting High-energy Neutrinos from Microquasars with the ANTARES Telescope <i>G. F. Burgio for the ANTARES Collaboration</i>	177
Neutrinos from Microquasars <i>Diego F. Torres, Gustavo E. Romero and Felix Mirabel</i>	183
Jets Accelerated From the Disk Coronae in Active Galactic Nuclei <i>Xinwu Cao</i>	189
Particle Acceleration in Astrophysical Shear Flows <i>Frank M. Rieger and Peter Duffy</i>	195
Phenomenological Analogies in TeV Blazars and Black Hole X-ray Binaries in Low State <i>You-Hong Zhang</i>	201

Gamma-ray Emission in GPS Quasars <i>Jin-Ming Bai</i>	207
Optical Variability of Blazars (Invited Report) <i>Jun-Hui Fan</i>	213
Thomson-thick AGN— a Radio Emission View <i>J. Yang and X. Liu</i>	224
Faint Radio Active Galactic Nuclei <i>L. Gregorini</i>	229
Black Hole Mass of Microquasars and Quasars <i>Xue-Bing Wu</i>	235
Outflows and Inflows in Astrophysical Systems <i>Yue Shen and Yu-Qing Lou</i>	241
Preliminary Results of the Optical Observations of Three Microquasars <i>J. Z. Yan, Q. Z. Liu and H. R. Hang</i>	247
Simulating Pairs of HFQPOs from Micro-Quasars with Equivalent Circuit <i>Guo-Zheng Yao and Ding-Xiong Wang</i>	253
Radial Epicyclic Frequency in a Perfect Fluid Disk Around Compact Objects <i>Lei Qian and Xue-Bing Wu</i>	258
Applying Magnetized Accretion-Ejection Models to Microquasars: a preliminary step <i>P.O. Petrucci, J. Ferreira, S. Tricot, G. Pelletier, C. Cabanac and G. Henri</i>	263
GMRT Observations of Microquasar V4641 Sgr <i>C. H. Ishwara-Chandra and A. Pramesh Rao</i>	269
X-ray Spectral Behavior in the Low/Hard States of Black Hole Candidates <i>Kazutaka Yamaoka, Masami Uzawa, Mariko Arai, Tohru Yamazaki and Atsumasa Yoshida</i>	273
A New Model for Gamma-Ray Burst Powered by the Blandford-Znajek Process <i>Wei-Hua Lei, Ding-Xiong Wang and Ren-Yi Ma</i>	279
Microquasar Models for 3EG J1828+0142 and 3EG J1735–1500 <i>V. Bosch-Ramon, J. M. Paredes, G. E. Romero and D. F. Torres</i>	284
The Relation between X-ray Spectral Index and the Eddington Ratio in AGNs <i>Wei-Hao Bian</i>	289
Searching for the Physical Driver of the Correlations for an X-ray Selected AGN Sample <i>Da-Wei Xu, S. Komossa and Jian-Yan Wei</i>	294
The Spectral Energy Distributions of Different Types of Seyfert Galaxies <i>Ran Wang and Xue-Bing Wu</i>	299
Helical Motion and the Origin of QPO in Blazar-type Sources <i>Frank M. Rieger</i>	305
On the Possible Origin of Optical Circular Polarization in Blazars <i>Frank M. Rieger and Karl Mannheim</i>	311

Study the X-ray Dust Scattering Halos with Chandra Observations of Cygnus X-3 and Cygnus X-1	
<i>Jingen Xiang, Shuang Nan Zhang and Yangsen Yao</i>	318
A Simple Idea for the Changing Sign of the Lag in Microquasars	
<i>P. Varnière</i>	325
A GHz Flare in a Quiescent Black Hole and A Determination of the Mass Accretion Rate	
<i>Sabyasachi Pal and Sandip K. Chakrabarti</i>	331
Multiwavelength Observations of one Galaxy in Marano Field	
<i>Y. C. Liang, F. Hammer, H. Flores, D. Elbaz, L. C. Deng, F. Assémat, N. Gruel, X. Z. Zheng, D. Marcillac and C. J. Cesarsky</i>	335
Observations of Gamma-Ray Outbursts from Galactic Microquasars	
<i>G. L. Case, M. L. Cherry, C. Fannin, J. Rodi, J. C. Ling and W. A. Wheaton</i>	341
The Black Hole Mass and Magnetic Field Correlation in Active Galactic Nuclei	
<i>Wei-Ming Zhang, Ye Lu and Shuang-Nan Zhang</i>	347
Astrophysical Quark Matter	
<i>Renxin Xu</i>	353
